

# HOME MODIFICATIONS ASSESSMENTS AND DESIGN

Home Modifications can be **both functional** and **aesthetically pleasing**

Home modifications to your living environment may be needed if you have a physical and/or cognitive disability to make your home safer, easier to move around in, better suited to your current abilities and/or allow for the installation of Assistive Technologies.

### MPOT/Access Fitness provide:

- Home access modification and equipment assessments and reports
- Design and Drafting of plans if required by an experienced drafts person
- Better results by combining the skills of qualified builders and providers

### Home Modifications Assessments and Reports address the following areas:

#### Access to personal and self care facilities

Domestic activity, including housework, grounds care and home maintenance

#### Physical function, including hand function, seating and positioning

Mobility and transfers, including risk assessment and injury prevention

#### Access to leisure and non-vocational activities

### Recommendations may include:

- Environmental modifications; including drafting of plans once approved
- Specialist equipment assessment, provision and follow up including custom designed equipment
- Assistance with participation in ADLs including strategies for task modification

### - SERVICES CAN BE ACCESSED BY -

NDIS Participants | Privately Insured Clients | GP Plans | DVA Clients (Gold and White Card Holders)  
 Clients with Third Party / Compensable Claims - including  
 Workplace Injury, Motor Vehicle Accident, Income Protection / Disability & Public Liability
